SUMMARY

Innovative Java Web Developer with solid experience in designing, coding, and debugging web applications using Java technologies. Strengths include knowledge of databases, user interface design, process optimization, and project management. Skilled in utilizing programming languages such as HTML, CSS, JavaScript, to build user-friendly digital platforms.

PROJECTS

DevLifeCare

It is a full-stack project on Hospital Management that utilizes HTML, CSS, Java, MySql and Bootstrap. The project focuses on serving doctors, patients, and hospital administrators. The project caters to doctors, patients, and hospital administrators. Users can create accounts, log in, book appointments, and also log out. For doctors, there is a separate login page where they can manage their work. Additionally, administrators have their own login page to monitor all activities.

Hotel Reservation PROJECT

Hotel Reservation System. This project is a simple and interactive hotel reservation system implemented in Java and MySQL. It allows you to manage hotel reservations, view current bookings, edit reservation details, and more. Perfect for small hotels and guesthouses.

ACCOMPLISHMENTS

4 Star in Java and C in HackerRank.
